

Wellness

EXPERIENCES

Enjoy a unique, peaceful and relaxing experience.

We invite you to discover Secret Spa, a space designed to relax and get away from all tensions.

From the very first moment, our guests are plunged into a sensory circuit, through the harmonization of sounds, giving way to a special ritual of therapeutic colored lights in the tepidarium, based on chromotherapy.

The body slowly prepares to flush out toxins in the dry sauna, which makes the skin softer through clear notes of heat, and then purifies the body and improves circulation with a water bath in the Scottish shower. This shower functions due to the combination of high temperatures, which are applied at high pressure in specific areas of the body.

Continue this journey of sensations with any of our body and facial treatments, and discover the benefits of the exclusive creams from the Germaine de Capuccini Professional Cosmetics line, committed to the protection of the environment, and which provide elegance, serenity, beauty and purity to the skin.

Treatments and massages are offered in our rooms, delicately and comfortably decorated, with warm natural light, creating an ideal environment for complete relaxation. Our rooms also lavish our guests with an exclusive view of the magnificent Rodríguez Peña square gardens.

A true moment of peace and renovation for your body and mind.

Harmony Day

4 hours

Enjoy a moment of relaxation through the senses.

Aromatic essences and bowl music will allow you to balance your chakras and flow into a state of total serenity.

A SENSORY EXPERIENCE TO REGAIN
THE ENERGY OF THE BODY AND THE MIND

DRY SAUNA

Ideal for epidermis renovation, leaving the skin softer. Its relaxing effect is immediately perceived as soon as the body comes into contact with the heat. The use of dry sauna helps muscles acquire greater flexibility, as well as opening up the pores, stimulating skin sweating and the elimination of toxins.

TEPIDARIUM

Chromotherapy is a type of complementary treatment that uses light waves. It has an effect on the body's cell's, improving the balance between body and mind, where every color has a different therapeutic function.

- Red.** It increases the energy in order to help blood circulation. It should not be used in cases of anxiety or emotional distress.
- Orange.** It increases the action of the sacral and solar plexus chakras (energy centers). It is also used to treat energetic disorders of the kidneys.
- Yellow.** Considered a purifying and detoxifying color, it is used to treat all kinds of physical disorders. It also acts as antiseptic.
- Turquoise.** Combined with red, it helps eradicating acute infections of the energy flow.
- Blue.** It is a soothing color; therefore, it helps reduce pain. It can boost spiritual growth and balance sleep patterns.
- Violet.** It is suitable for the eyes and for the blocked energy that causes nervous disorders. It favors inspiration, revelation and the growth of the superior being, although it can also be linked to spiritual accomplishment.

Tepidarium improves physical and mental well-being. It helps to reduce physical weariness and sleep disorders. It is also effective in headache treatments and stimulates the central nervous system.

SCOTISH SHOWER

It combines hot and cold streams of water, applied at high pressure in specific points of the body. The sessions usually last between 15 and 30 minutes. They are taken after a sauna session, since they help release all the toxins of the skin, as pores are opened.
